Penguins belong to the bird family. There are 18 different types of penguin.				
The little penguin is the smallest. The emperor penguin is the tallest.				
Penguins have black or dark brown bodies and white bellies.				
Some penguins have some coloured feathers, too.				
Penguins have two short legs. Their feet are webbed. They have flippers instead of wings. Penguins spend some of their time on land. They cannot fly.				

They can stand up and waddle around.				
Penguins that live on ice can slide along on their bellies.				
This is called tobogganing.				
Penguins also spend time in the sea.				
They swim by flapping their flippers in the water.				
Penguins eat fish and other sea creatures like squid and crabs.				
They catch their food in the water.				
Penguins lay their eggs on land.				
Most penguins lay only one or two eggs at a time.				
Baby penguins are called chicks.
