Quick Guide
Homework

LiteracyPlanet®

What is homework?

Homework is learning assigned to students as an extension or elaboration of classroom work. To help develop and build upon literacy skills, teachers assign tasks that students can practice at home. Research reveals that homework is more beneficial for older students, from Year 3 and above.

Teachers assign homework to help students build upon, reaffirm or extend on what has been learned in the classroom. Homework is also an effective strategy for developing a consistent routine and self-discipline.

How LP does it

LiteracyPlanet enables teachers to easily assign and manage tasks that build upon or extend upon what students have learned or are learning in the classroom. Lessons can be assigned in minutes, helping teachers develop student literacy needs beyond the classroom environment.

With the Teacher Assignment Tool, lessons can be assigned as homework within minutes, and with automatic marking and progress tracking, teacher can see student progress in real time. No more marking!
