<p>Community Helpers</p> <p>Did you know my uncle is a community helper? He is a pilot. He flies people to see their families and friends. He takes them to visit places around the world.</p>				
<p>Schedule</p> <p>My uncle leaves for the airport early in the morning. He makes sure the plane is ready to go. Then he takes off down the runway. Sometimes he's gone for several days. He flies to other countries. He has days off, too. When he comes back, he brings me gifts from different countries.</p>				

<p>Uniform</p> <p>My uncle wears a pilot's uniform. You can see his hat and his shirt. He wears sunglasses to protect his eyes while he is flying. He sometimes wears a jacket, too. My uncle is a captain.</p>				
<p>Pilots</p> <p>Pilots can fly from city to city or from country to country. They carry passengers and cargo. Pilots can even carry soldiers to bases around the world. There are different kinds of pilots. Military pilots train with the air force. They can become fighter pilots. Airline pilots work for airlines, carrying passengers around the world. Some pilots work for private companies.</p>				
<p>Job</p> <p>My uncle sits in this cockpit, and his co-pilot sits next to him. See all the screens and buttons? My uncle knows how to control the plane with these. Not only that, my uncle needs to know about the weather. Sometimes he must fly when the weather is bad. I don't like flying in stormy weather.</p>				

<p>History</p> <p>Long ago there were no aeroplanes. People travelled only on land by trains or cars. If they wanted to go to another country, they went by ship. Orville and Wilbur Wright, brothers from the United States, were the first to build a glider plane. Soon aeroplanes were able to carry people.</p>				
<p>How to be a Pilot</p> <p>I'm thinking about being a pilot when I grow up. I love flying. I'll need to go to flight school uncle says. I'll learn how to fly a plane and learn how aeroplanes work. After training and passing tests, I'll get my wings. That means I can have a pilot's licence. My Uncle says there are different kinds of tests for different types of planes. But if I want to be a military pilot, I'll be a cadet at the air force academy.</p>				
<p>Conclusion</p> <p>I like that my uncle gets to fly to new places around the world and meet all kinds of people. I want to do</p>				

that, too.
